DOVIT
Give your home a brain.

Pilot your smart home with a **simple and user friendly application**

Designed from the real needs and expectations of the end user, DO.App is a graphical interface for managing all the technology present in a house or building. It is independent of the brand or protocols used.

Imagine controlling your lighting, your air conditioning, your heating, but also your alarm system and your connected speakers. All this from a single interface.
DO.App's intuitive dashboard has been designed so that your entire smart home is at your fingertips as soon as you activate the application.

Hightly securized, DO.App works without Cloud and is directly connected to your own server.

You can access your interface locally from your home automation screen or remotely from your mobile devices.

Available on iOS and Android

Accessible from your screen and from your other mobile devices,

DO.App centralizes your home automation system

User friendly interface easy to customize

8 configurable languages

Available on Android, iOS, Microsoft and Linux

Unique user profile for each family member

Accessible from your DO.Touch screen

Quick creation and activation of scenarios for all rooms

Energy data recording and analysis

Hourly planning of all functions and scenarios integrated in your installation

Association of each scenario with Alexa and Google Home

The most user-friendly home automation app

Enjoy a unique and simplified user experience thanks to the supervision of all the functions of your installation: lighting, thermoregulation, motorization, alarm, video surveillance, multimedia, videophony, photovoltaic installation, energy and consumption meters, access and passage control, etc.

An interface available in 3 color versions

For your comfort and according to your taste, customize the interface of your application with 3 color themes:

Dark, silverlight and light

You have the choice between independent and calendar programming for each function of your smart home

An app available anywhere, anytime

Stay on top of everything going on in your home with status notifications on your app!

Create your own
customized scenarios easily

Scenarios accessible quickly and according to predefined schedules

The Scenario feature of the application allows you to control several devices at the same time.

You can create and launch scenarios directly from your application.

So, enjoy creating personalized routines for each of your rooms and for each member of your family.

Start all your home automation scenarios with a single click or schedule them according to set times and days.

Add your favorite routines directly on the home screen of your application for quick access.

Our application is well **designed, simple and compatible** Like our solution!

It offers maximum security, confidentiality of information, immediate and bidirectional management (command and feedback). A touch is enough to connect to your system (no cloud required).

Simultaneous multi-user connection and management via a TCP/IP network is possible.

It is compatible with Dovit touch screens, smart TV, smartphones and tablets (iOS, Android), Windows, Mac OS and Linux computers.

Free download from official reference platforms (App store and Google Play).

Desktop application

DO.App is available as an application for all desktop systems: Mac OS, Windows and Linux.

The graphical interface DO.App via desktop application has all the features, including bidirectionality and push notifications. It is the ideal interface for supervision from a workstation. This solution is also adapted to the centralized management of a hotel lobby or the concierge of a residence and everywhere where it is necessary to unify and centralize (on one or more stations) the management of all technical installations.

A home screen fully **customizable according to the user wishes**

You will design your own dashboards with the most frequently used devices and features. With drag and drop, you will be abble to place and move all the widgets in the application as you want!

You can create up to 32 user profiles automatically synchronized between all your devices.

DO.Touch, the stylish screen
with premium finishes to control your smart home

Control and manage your smart home from the DO.Touch wall-mounted touch screen. Its intuitive interface will offer you a unique and customizable user experience.
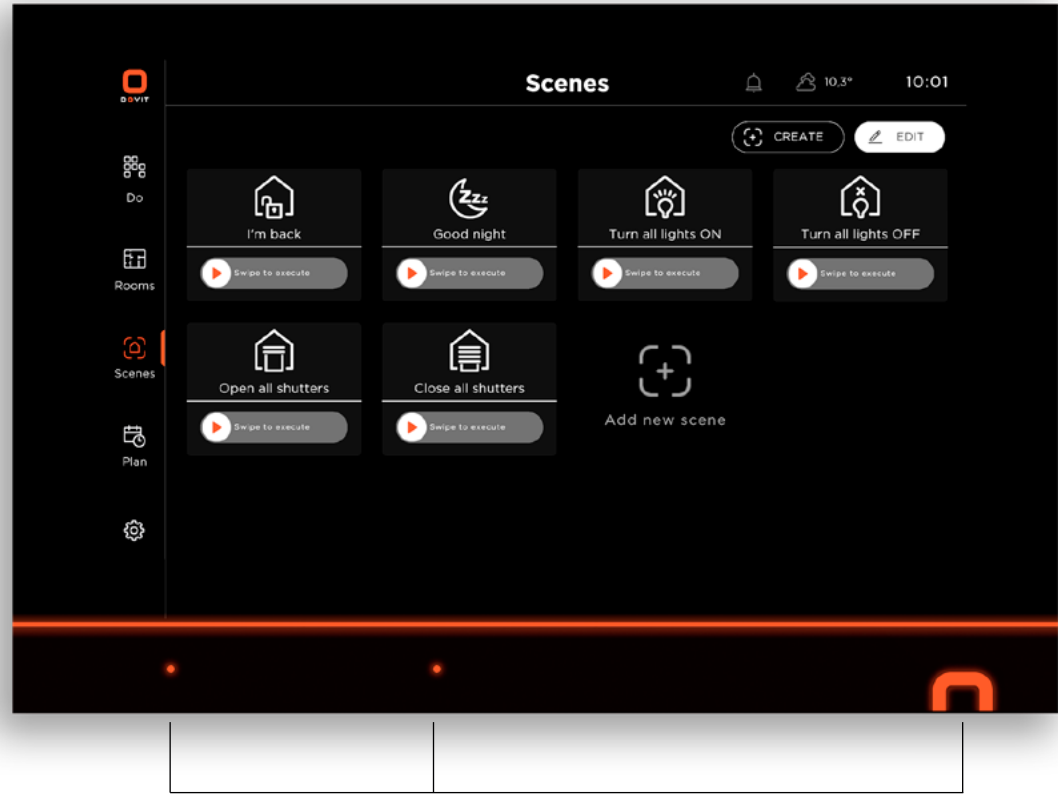

Touch, command, control.

Improve your living comfort with the innovative DO.Touch screens! These touch and connected screens have been designed to offer you a new contact with your home.

The design and quality of your smart home are one of our priorities. DO.Touch screens have been designed to match all interior styles.

Our DO.Touch screens range from 4" to 11.6" with a wide choice of finishes and colors. Black, white or even with a mirror reflection, there is bound to be one that matches your home and its decoration!
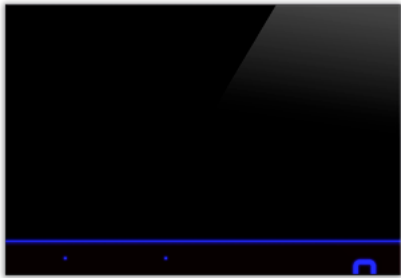

Many choices of RGB colors to customize the LED strip

3 configurable touch buttons (which can be assigned to scenarios or quick access to favorite sections of the application)

Features	
Sizes	10" (276 x 187 x 14 mm)
Alimentation	12..24 Vdc wire connection on terminal block / 2 A max (power supply not included)
Network and connectivity	Gigabit Ethernet controller
Audio	2 speakers with 1,5 Watts amplification
	Microphones offer high quality technologies capable of open field voice capture (including echo cancellation, noise suppression, voice activity detection and management)
	VoIP SIP client

DO-MB-TOUCH-10-WA, a stylish and customizable touch screen wall for a **minimalist interior**

Customize the color, display and light intensity of the 6 touch controls.

When notifications appear on the screen (doorbell, alarm, ...), the display color, but also the type of display (continuous, flashing, changing) can change automatically when they arrive. You quickly notice that events are taking place in your home!

A night mode is available to completely turn off the screen when you want.

The brushed aluminum casing of the DO.Touch screen guarantees premium quality and durability!

Its 3mm thick tempered glass finish with its anti-stain treatment offers a design surface that is easy to clean.
