DO.Tatto, our touch-sensitive and customizable switches

DOVIT
Give your home a brain.

For your real estate **simple and modern**

Contemporary, elegant and easy to use, the range of products DO.Tatto allows you to create modern and innovative solutions. Associated with our Dovit Smart Home ecosystem, daily management has never been so simple and customizable!

DO.Tatto: a range of touch-sensitive switches with tempered glass finish and discreet backlighting. Switches with customizable icons where each control point can be programmed to manage all the functions of a home automation system. From the most traditional functions, such as lighting management or motorizations, to the most advanced ones, such as temperature and humidity regulation,

scenario management and more.

To develop this new range of products we have followed your advice.

DO. Tatto products have been designed to provide flexibility in the design and implementation of modern technological systems.

The products DO.Tatto. guarantees a unique and immediate experience.

One product, multiple functions.

Management of all types of lighting

Compatible with a wide variety of motorisation and opening devices (blinds, shutters, awnings...)

Multiple controls for many devices (ventilation, multimedia, alarm systems etc.)

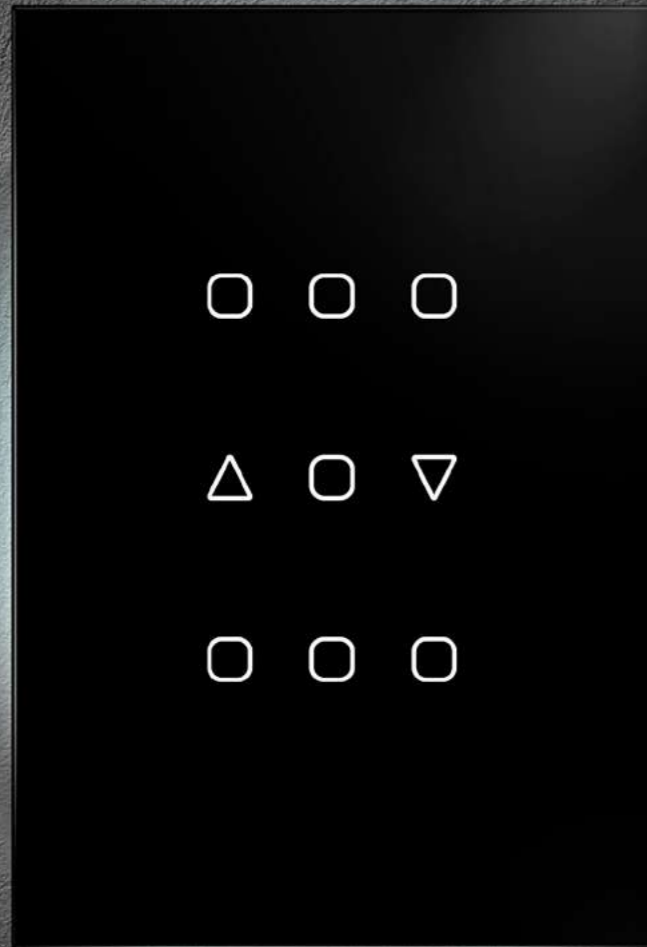

Integrated temperature and humidity control

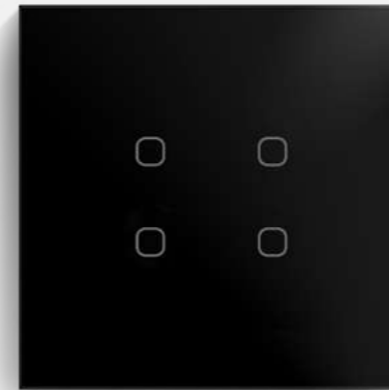

Bright and **modern**

DO.Tatto can be used as ambient lighting by activating the perimeter lighting manually or via time schedules and scenarios.

It is possible to leave the icons always visible.

With the "ghost" mode, the pictograms become invisible when the switch is not used. The proximity sensor brings your Tatto back to life with the backlighting as you approach your hand.

It is possible to adjust the backlight power of the icons.

Light intensity

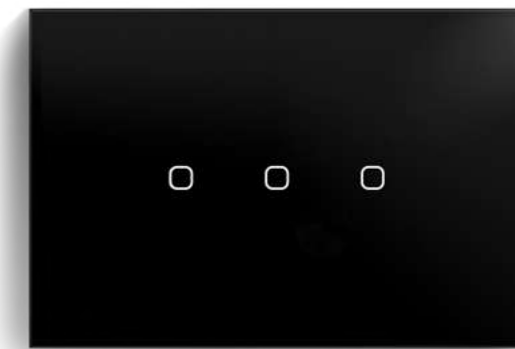

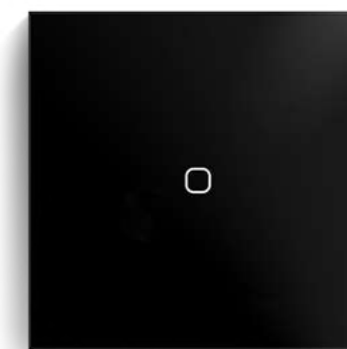

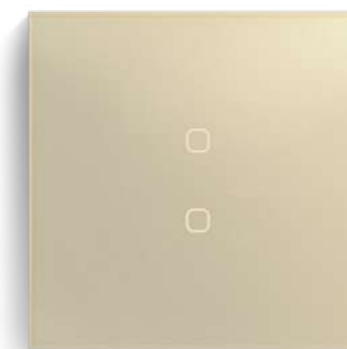

DO.Tatto allows you to adapt the light intensity to your environments and your daily needs. The Light intensity can also be programmed according to time schedules or scenarios.

Switches to match the **design of your home**

Available in rectangular shape 125x85mm and in square shape 85x85mm.

Discover our catalogue of standard glasses where you can find more than 100 different combinations (different colors, icons and number of commands).

A multi purpose switch

Say goodbye to unaesthetic switch columns. Centralise all the room's functions to a single switch for an uncluttered interior. Unlimited customisation, programming from 1 to 9 visual commands and up to 20 common commands with touch recognition.

The choice is yours, there's sure to be one for your smart home!

Puristic and discreet design to fit any interior style

Ideal for managing scenarios and light intensity of any light point

Light feedback

An icon can be illuminated to signal specific events such as an enabled alarm an open door or simply a light on.

Custom icons

Modular glass according to your needs

Dovit Icon Library

In addition to choosing from more than 100 different combinations you can compose your glass from a wide library of icons.

Tailor-made design service

On request you can go further in the customization process by asking our design studio to create icons or logos tailored to your projects. Ideal for hotels, shopping centers, shops, showrooms etc.

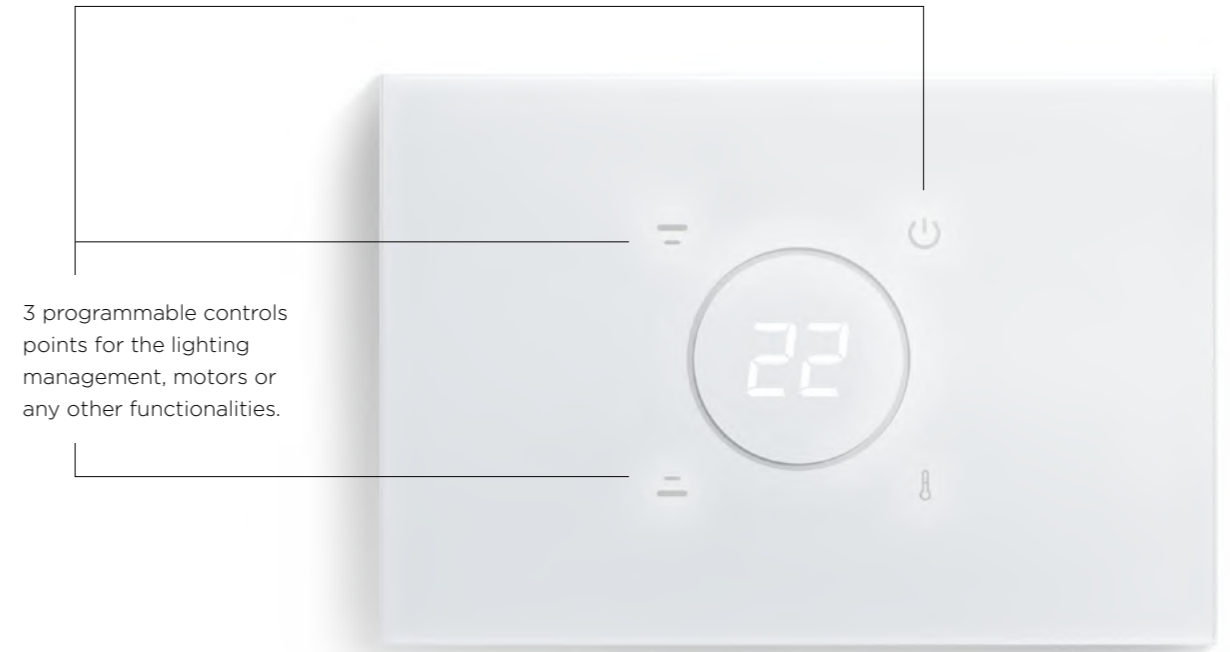

Touch-sensitive and smart thermostats

Perfectly integrated into our range of DO.Tatto products, our thermostats allow users to control temperature and humidity directly from an integrated mini-display.

View the room temperature at a glance and adjust it manually with the control points and touch circle.

Possible to connect a remote probe or an open window contact to optimize energy management.

3 programmable controls points for the lighting management, motors or any other functionalities.

Thermostats are only available with serigraphed icons and without "Ghost" mode.

Technical features

One product for multiple projects and solutions

Do.Tatto switches are composed by a plate and a glass sold separately to make the project desing more simple and flexible.

Only 6 references of plate to meet all your expectations!

The D-KP-85 can be configured with 1, 2, 4 and 6 commands. It is available with temperature sensor (**D-KP-85-T**) or humidity and temperature sensor (**D-KP-85-TH**).

The D-KP-125 version can be configured with 1, 2, 3, 4, 5, 6 and 9 commands. This product is available with temperature sensor (**D-KP-125-T**) or humidity and temperature sensor (**D-KP-125-TH**).

The surface, made of tempered glass, is resistant and easy to clean.

The hanging system has been improved to meet professional standards (D60, 502, 503).
