Simplicity and performance: **Dive into the world of Dovit and KNX**

Welcome to the refined and technologically advanced world where **Dovit, our Smart Home solution, merges with the KNX protocol**, thus opening the door to an exceptional home automation experience.

In this perfect symbiosis, our KNX server is a central element dedicated to efficiency and connectivity. This server, the true conductor of the smart home, ensures smooth communication between Dovit devices and the KNX protocol, creating an ecosystem where every action is executed with precision.

Dovit presents a range of products designed to perfectly complement the KNX solution.

Our complete range of DO.Tatto switches, now available in a KNX version, combines contemporary elegance with advanced functionality.

The DO.Touch smart touchscreen represents the ultimate interface for intuitive management of your KNX home.

For easy and smooth management of your KNX home, **the DO.App application** is the ideal tool. This user-friendly application is perfectly synchronized with the KNX protocol.

The integration of Dovit with KNX redefines the concept of the smart home, offering unmatched ease of use and seamless interconnection between the various elements of the living space.

The KNX server: Epicenter of the smart home

Simplified control with the KNX server

Our dedicated KNX server, at the heart of the ecosystem, ensures smooth communication between all connected devices, highlighting the KNX standard known for its open standard. It allows for simplified control of all aspects of the home, orchestrating a symphony of connected devices for a modern and harmonious home automation experience.

The difference? Home automation without protocol limits

Dovit stands out by offering an open and versatile home automation solution. Our server supports various standards such as ZIGBEE, MODBUS, DALI, and many others.

It is this versatility that distinguishes us and allows us to provide a comprehensive solution in terms of home automation.

zigbee M-Bus DALI ...

At the heart of the rapid evolution of home automation, Dovit stands out with its dedicated KNX server. This carefully designed centerpiece embodies Dovit's commitment to innovation and ease of integration in home automation.

Elegance and functionality: DO.Tatto redefines home automation

At the heart of our home automation offering are the DO.Tatto switches, an innovative range that combines style, functionality, and compatibility with KNX.

These connected switches revolutionize the way we interact with the connected home, offering total control over a multitude of functions, from simple lighting to blinds, multimedia, alarms, temperature, and much more.

Manage your energy with smart thermostats

DO.Tatto goes beyond simple lighting and blind management. With its thermostat version, it offers total control over your heating system, thus optimizing your home's energy consumption.

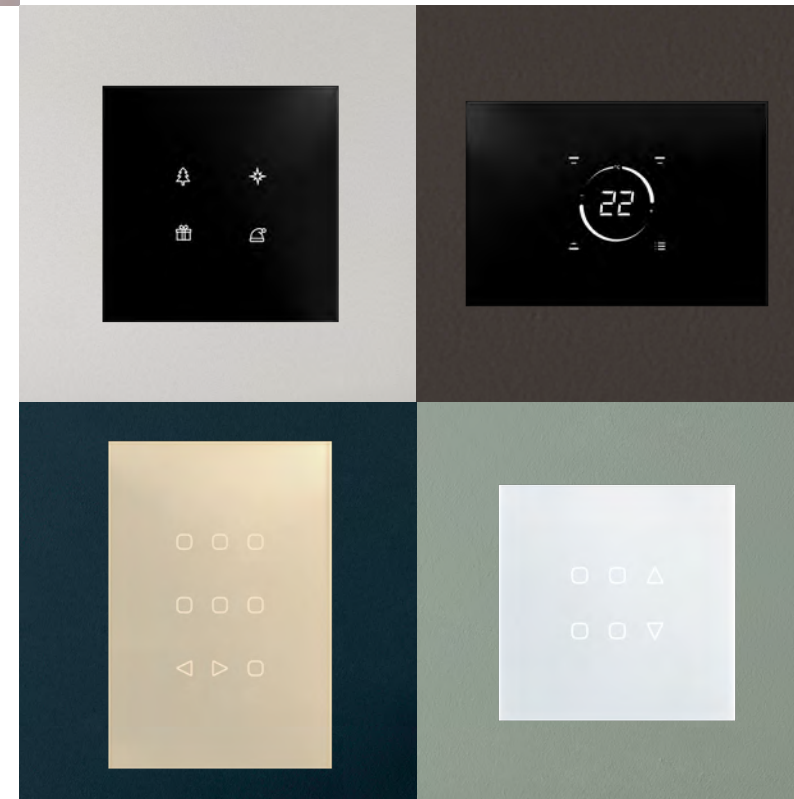

DO.Tatto enables the creation of a smart home where each interaction contributes to an exceptional and eco-responsible home automation experience.

A customizable touchsensitive tempered glass switch

What particularly distinguishes the DO.Tatto switches is their full compatibility with the KNX protocol, thus offering perfect integration into existing installations.

Say goodbye to bulky switches and hello to a sleek aesthetic with DO.Tatto. Customizable in terms of color, size, and icons, they naturally blend into every interior.

Thanks to touch recognition, program from 1 to 9 visual commands and up to 20 standard commands.

DO.App: The most user-friendly KNX experience

Dive into the refined world of the smart home with DO.App, a simple home automation application perfectly compatible with the KNX protocol.

This application provides an unmatched user experience, allowing for intuitive and enjoyable control of every aspect of the smart home.

Imagine a single interface that gives the power to supervise and harmonize lighting, air conditioning, heating, security, and multimedia from a smooth application available in 8 languages.

DO.App turns this vision into reality, offering a fast and accessible user experience to all KNX users.

The smart gateway to personalized comfort

The home screen of DO.App is an instant gateway to complete home management. With a simple click, explore and control every feature of the home automation system. Adjust the color and brightness of light sources with a gesture, customize the experience according to your preferences.

GooglePlay

Smart scenarios made simple

The versatility of DO.App is not limited to our home automation solution. It extends to all KNX installations, making this application the most user-friendly and accessible for controlling a KNX system.

Creating personalized scenarios is a breeze with DO.App. You can easily define sequences of actions for different elements of the house, such as lighting, temperature, blinds, and much more.

KNX technology, DO.Touch elegance: The connected touchscreen

Harmonize design and home automation with DO.Touch, a smart screen that integrates seamlessly with KNX technology. From 4" to 10", each touchscreen offers a variety of finishes and customizations to suit all interior styles.

The compatibility of DO.Touch with KNX and other protocols makes it a central hub for controlling an entire connected home. You can access all the home automation functions of the dwelling from a stylish wall-mounted screen.

Smart Renovation: Dovit elegantly harmonizes KNX projects

More than an upgrade, a new modernity

With Dovit, KNX projects welcome innovation without disruption, enhancing the simplicity and efficiency of renovations. Dovit's natural compatibility with existing KNX installations guarantees success for any renovation project, offering a smart solution that evolves with the changing needs of each building.

Dovit and KNX: Designed to evolve according to the user

Simplified KNX experience with Dovit

Dovit offers a smooth and elegant experience by simplifying the use of KNX. Designed to enhance user experience, Dovit stands out with its intuitive interface and perfect integration with KNX. The easy navigation within the DO.App application allows users to fully leverage the advanced features of KNX without complications.

An evolving smart home

The Dovit KNX system is scalable, ensuring that the home adapts to future needs. What makes Dovit truly exceptional is its commitment to scalability. Users have the freedom to customize and develop their home over time, adding new functionalities and integrating new devices as needed. Dovit offers a solution that is both contemporary and future-ready.

Simplified KNX integration with Dovit

Ease of Dovit integration into KNX projects

Dovit greatly simplifies installation by integrating quickly and easily into KNX systems, offering installers an intuitive and efficient solution for seamless integration into their projects.

Support from the project design phase through to after-sales service

Dovit offers comprehensive expertise in home automation, supporting projects from the development of the specifications to after-sales. To strengthen this collaboration, we offer free training aimed at certifying our partners.
